

Bellevue Medical Center

Introduction

Bellevue Medical Center in Mansourieh - El Metn, is opening its doors and heart to the community.

Located in the splendid and serene valley of Qanater Zbaydeh, only 15 minutes away from downtown Beirut, Bellevue Medical Center is one of the few health centers in the country that provides treatment in the most tranquil atmosphere.

With an exceptional capacity to provide world-class healthcare, through sophisticated equipments, a highly skilled medical team, and the application of international accreditation standards, Bellevue Medical Center plans to influence the

world of medicine by establishing itself as a general hospital that offers incomparable health services in all specialties, becoming one of the country's top healthcare institutions.

About Bellevue Medical Center

✘ The site:

The total built area of Bellevue Medical Center is 30,000m², divided on 8 floors, each of them overlooking the archeological ruins of Qanater Zbaydeh and exposed to natural daylight.

The overall infrastructure has been set up in a manner that facilitates patients' admission process and maintains their privacy and safety throughout their stay.

This patient-friendly environment surrounded by beautiful scenery provides a relaxing atmosphere to our patients, ensuring at the same time patient's privacy and confidentiality.

✘ Our Mission & Vision

At Bellevue Medical Center, our mission is to provide efficient, high quality and safe healthcare services that meet international standards, through education, team work and innovation.

We aim to be the hospital of choice for patients, doctors, and healthcare providers.

✘ Our Commitment

At Bellevue Medical Center, our patients are the center-point for all our activities.

We are committed to treating our patients with compassion, trust, honesty, integrity, efficiency, courtesy and respect.

At Bellevue Medical Center, we are determined to improve the quality of life in the communities we serve.

✘ Our Staff

BMC's growth is based on careful selection of its human and technical resources.

We strive to hire the best physicians, nurses, and allied healthcare professionals in order to achieve our organization's professional and ethical goals.

We highly encourage team work within and across the different departments to ensure the best patient care

Moreover, the hospital also provides a 24-hour ambulatory service that attends to the immediate and urgent needs of the community.

Centers of Expertise

At Bellevue Medical Center, the musculoskeletal center, the women's wellness center, the behavioral health center, as well as the emergency unit, are centers of expertise offering distinguished services. Patients suffering from such conditions have access to world-class facilities, equipment, trained staff, and standards of care that are unequalled in Lebanon and the region.

✘ Musculoskeletal Center

One of the biggest departments in Lebanon, the

musculoskeletal department at Bellevue Medical Center boasts a large patient ward with specialized rooms and the most equipped physiotherapy and rehabilitation center in the country.

This physiotherapy area is divided into two parts, dry and wet. The dry area includes a state of the art gymnasium with a wide range of specialized equipment for different types of rehabilitations. The wet area includes a hydrotherapy pool, and other new-line wet therapy.

Partnership with Lund University

The Bellevue Medical Center has been proudly chosen as a **partner in the Lund University WHO collaborating center for evidence-based health care in musculoskeletal disorders**. This center will be conducting world-class research on the etiology, prevention, treatment, and successful implementation of musculoskeletal health strategies in the aim of advancing musculoskeletal diseases conditions at the global level.

✘ Women's wellness center

The Women Wellness Center at Bellevue Medical Center offers the female patient specialized and individualized healthcare services to fit her needs, in a serene and private quarter surrounded by nature, contributing to the acceleration of the healing process.

The Women Wellness Center at BMC is a big center divided internally to sub departments where the woman finds a wide range of highly diversified and personalized services, including:

- Esthetical Dermatology
- Plastic surgery
- In vitro fertility department
- Delivery department with a cesarean room included
- Obstetrics and Gynecology clinics
- Oncology clinics
- Digital mammography unit
- Ultrasound unit
- Nutrition

✘ Behavioral health center

The Behavioral health facility at the Bellevue Medical Center is unique in Lebanon. It offers a specialized psychiatric care service within a purposely designed, peaceful and home-like atmosphere. Patient bedrooms are cozy and warm, and at the same time, the highest international safety standards are respected.

The behavioral health program proposes several lines of services for both in and out patients. It concerns patients suffering from a variety of emotional, cognitive and behavioral disorders, including, mood and anxiety disorders, substance addiction, eating disorders, psychotic disorders, personality disorders, and other specific conditions.

In addition, the behavioral health department at BMC is the only facility in the region offering a myriad of services for the patients such as a music room, social board room, arts and crafts room, a quiet lounge, a multi-purpose relaxation room, a therapy room, a kitchenette.

✘ Emergency Unit

One of the most elaborate emergency centers in the country, the ER at Bellevue Medical Center consists of 13 beds, and is directly connected to the radiology department and to the minor and major operating theaters (7 operating theaters up to 55 m² surface area, with a special laminar flow and unique ventilation units).

This efficiency in connecting the ER, Radiology, and ORs has been conceived to optimize patient care and reduce waiting time for patients especially in painful situations.

In addition, these departments ensure two separate unidirectional circulations for inpatients and outpatients.

Cutting-Edge Medical Equipment:

To better serve our patients, we offer an exceptional range of latest technology diagnostic equipment including an MRI, CT scan, Fluoroscopic X-Ray, Routine X-Ray, 4-D ultrasounds, 3-D echocardiography, bone densitometry (I-DEXA), digital mammography, and other advanced

equipment in different specialties.

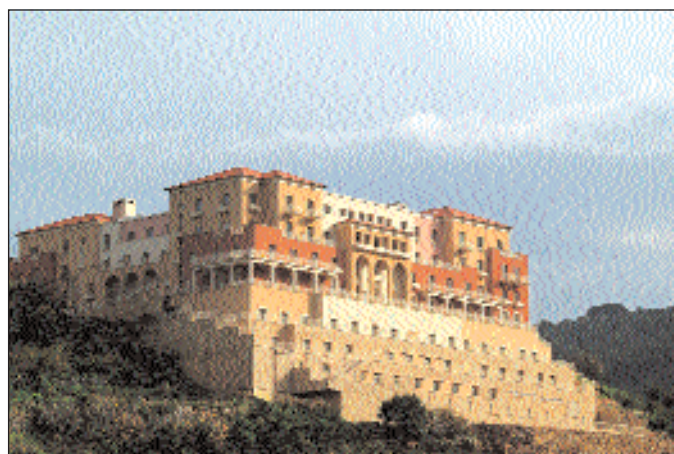

In addition, a telemedicine system in the operating rooms allows direct transmission of operations and procedures to the outside.

Operational Standards:

BMC is committed to operate under very high standards in order to ensure the highest quality service for its patients. It is one of the few hospitals in Lebanon and the region which have been built while respecting the latest international standards in healthcare, whereby **Joint Commission International (JCI)** consultants have been present since the early stages of construction.

In addition, the following standards have been set into place:

- Special vinyl floors in patient wards and critical areas
- Fire safety designed and built according to American standards (NFPA)
- Ventilation system designed and built according to American standards (ASHRAE)
- Psychiatry rooms especially built according to international psychiatry safety standards
- Surveillance cameras (~250) dispersed inside the building
- Sophisticated Building Management System (BMS) monitoring electro-mechanical functioning, temperature, humidity, ...
- Fiber optics networking
- Earthquake-safe basing
- Shelter for war emergencies
