

Medicine is continually evolving. We recognize that.

Our Continuing Medical Education Office at AUBMC anticipates and meets the medical education needs of physicians, nurses, pharmacist, and other healthcare professions in Lebanon and the region. We offer educational support, accreditation, and event planning in addition to high-quality CME, CNE, and CPE activities. Our educational activities are accredited by international, regional and local accrediting bodies such as AMA through Cleveland Clinic in the US, ANCC, Saudi Commission for Health Specialties (SCFHS), Hamad Medical Foundation - Qatar, National Association for Healthcare Quality (NAHQ), LOP, ONL and OPL.

Educational Activities that we offer through include:

- Live Conferences and Symposia
- Grand Rounds
- Professional Society Meetings
- Jointly Sponsored activities
- Development Workshops
- Courses
- Online and Blended activities

Hôtel-Dieu de France, the First e-Hospital in Lebanon

On the 23rd of October 2018, Hôtel-Dieu de France celebrated the launching of its integrated Hospital Information System (HIS), the first of its kind in Lebanon. This system's major advantage combines three of the hospital's main components: the patient's complete medical file, the financial operations file, and the Human Resources management file; therefore, making Hôtel-Dieu de France the first completely integrated e-hospital in Lebanon.

The event was held under the patronage and presence of the Deputy Prime Minister and Minister of Public Health, M. Ghassan Hasbani, and was attended by a number of public figures from both private and public sectors.

In her speech after the national anthem, Mrs. Jocelyne Ziadeh, HIS Director at HDF, described the early stages of the project in 2014 leading up to this day, noting the staff's considerable efforts and distinctive skills. She also thanked ITB, Medasys, Menaitech and SAP, the main partners, for the completion of this project.

Reverend Father Joseph Nassar, President of the hospital, followed with his speech, welcoming first and foremost Mr. Hasbani, thanking him for his continuous support and praising his efforts in the Ministry of Public Health.

"We are incredibly proud of today's event, he said, as it is part of the HDF 2020 plan, set up by the Administration Board in 2011. He followed concerning the partners: the acquisition and adoption of this integrated hospital information system has been achieved thanks to ITG's cooperation."

Reverend Father Salim Daccache, Rector of St. Joseph University noted that "Newer technologies, this system being one of them, are one of the key success factors when it comes to development in the health and care sectors", he went on saying, "this top of the line system cannot be improved from a professional point of view, however from an ethical stand point; we need to do everything we can in order to preserve medical confidentiality."

Mr. Hasbani spoke last and congratulated Hôtel-Dieu de France for all its advancements and contributions to the Lebanese health sector and the establishment's serious investment in the Fourth Industrial Revolution after the country's digital revolution. He then announced that the launch of the first digital hospital in Lebanon coincides with the approval of the health card's main laws, after having gone through many amendments in previous years to fit the Lebanese Ministry of Public Health's long-term plan, Health 2025.

Hôtel-Dieu de France remains a leading hospital in Lebanon and a pioneer when it comes to medical and health development, all the while staying true to its main objective: to provide patients with the best possible care and treatments.
